*I knew Linda when she lived across from my old building across the street. I knew her Daughter too, Angela. I was so devastated to hear of her passing in such awful way. I really loved her very much. I think about her from time to time about how much water she used with her plants. When she moved to where this that side of town where this event happened, I told her how tough the area was and to be very careful when she was out walking her pooch. I will always hold you close as my friend Dear Linda, I hope Heaven is a good place. Love You Always, Tom Gynn, Jr*

“ I guess better late then never.... I grew up with Linda on Clarence Ave. in Oak Park. I grew up across the street. One of my favorite memories was when my sister, Linda’s sister, Linda and I decided to make a birthday cake for their mom. For some reason we decided it had to be green. And it was the most awful cake ever! But the four of us had fun making it. After she moved I missed my friend and thought of her every now and then. When I heard the story on the news, even though I didn’t know her married name or what happened to her after they moved, I had an awful gut feeling it was her. Then confirmed by neighbors the next day. Even though I was very young I remember your kindness and friendship. Thank you for the memories. My deepest sympathy to the Murphy family and her daughter.

“ I think of Linda often and I pray that one day the person or persons that took this beautiful young lady from us will be brought to justice.

“ I didn't even know this was on-line. I've been thinking alot about Linda lately being it has almost been a year since her murder. She was a great friend and I miss her so much. I hope the people that killed her will be caught and justice is served.

“ I am so sorry for Angela for losing her mother. I have known Linda for 15 years. My son and Angela were in the same grade. We used to walk together from Washington school to our neighboring home. She was an undbelievable person. I am praying everyday that who ever killed her is caught.
